Emissions Certified Natural Gas Engine

SPECIFICATIONS

Configuration	4 stroke / 3 cylinder (inline)
Bore x Stroke	1.05 x 120 mm (4.13 in x 4.72 in)
Engine displacement	190 cid (3.12 L)
Firing order	1-3-2
Natural gas fuel pressure	Requirements – See operations book Emissions
Power	Based on 1,000 (HHV) btu/cu ft natural gas
Rotation	Counter clockwise (viewed from flywheel end forward – CCW)
Engine	Naturally Aspirated
Dry air filter	600 hrs or change & clean as needed
Compression ratio	10.0: 1
Battery Charging System	12V (63 amp.)
Rated power	Max output 24.5 bhp @ 1200 rpm
Power rating	Gross continuous 22.0 bhp @ 1200 rpm
Governor Type	Electronic 25 mm
Ignition	Belt-driven Magneto
Flywheel Housing	SAE 3
