

PRODUCT IMPROVEMENT

GOVERNER TUBING ASSEMBLY

A208657C

New for the VRG220/330 Engine applications

Arrow Engine Company in its commitment to provide continued support for our customers requirements is once again offering another time saving, easy to install product for the VR Series line of parts.

The new A208657C tubing assembly is interchangeable with all previous and current configuration oil tube assemblies for the VRG220/330 mechanical governor setups.

- Proven high temperature steel braided lines with JIC threaded fittings.

- Tubing assembly contains all hardware for complete changeover from old style tubing to the new steel braided hose design.

- Complete and detailed installation instructions included in every kit.

Note: This new style steel braided design will take the place of the previous tubing assembly on all production engines being manufactured from given date. In addition when placing an order for replacement parts the old style configuration will no longer be available.
