ARROW ENGINE™
ENGINES & COMPRESSION

ENGINES AND GENERATOR SETS

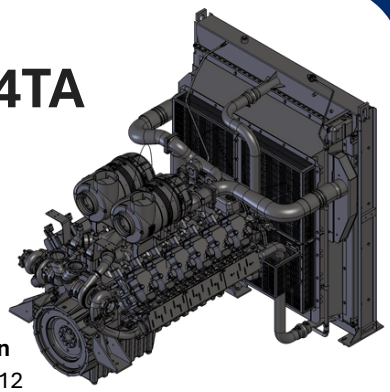
ENGINES

- Multi-cylinder A-Series and KP-Series engines ranging from 40 HP to 150 HP (EPA Certified).
- G-Drive, Power Unit, Compressor Spec and custom configurations available.
- Single-cylinder C-Series engines ranging from 5 HP to 32 HP (EPA Certified).
- True industrial engines featuring cast iron blocks, wet sleeves and Stellite valves.

GENERATOR SETS

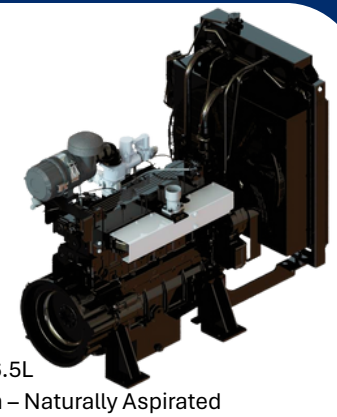
- NG/Propane generator sets ranging from 25 kWe to 100 kWe.
- Standard or custom packaging available.
- Mobile or stationary and fully engineered to order.

GKP24TA



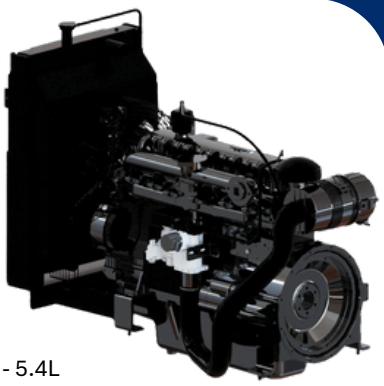
- **Coming Soon**
- Cylinders – V12
- Displacement – 23.9L
- Induction System – TCAC

GKP6



- Cylinders – I6
- Displacement – 6.5L
- Induction System – Naturally Aspirated
- Continuous HP – 85 (NG/1,800) / 94 (LPG/1,800).
- Standby HP – 94 (NG/1,800) / 105 (LPG/1,800)

G54E



- Cylinders - I6
- Displacement - 5.4L
- Induction System - Naturally Aspirated
- Continuous HP - 64 (NG/1,800) / 70 (LPG/1,800)
- Standby HP - 71 (NG/1,800) / 78 (LPG/1,800)

GAS COMPRESSORS AND PACKAGES

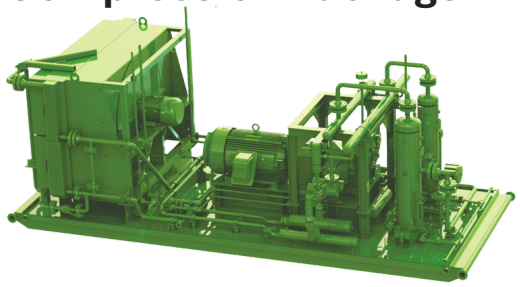
RECIPROCATING GAS COMPRESSORS

- Four frame sizes available ranging from 15HP to 550HP.
- Double-acting cylinder sizes ranging from 2.000" to 10.000".
- Steeple cylinder sizes ranging from 2.500"/1.125" to 7.000"/4.500".

COMPRESSOR PACKAGING

- Natural gas compressor packages are engineered to meet your exact operational needs, delivering unmatched performance, efficiency, and reliability in the most demanding conditions.
- Flexible designs available for applications up to 1000 HP utilizing dual compressors.

High-Pressure Compression Package

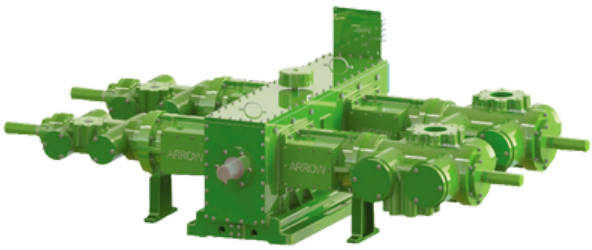


- Discharge pressure up to 6,000 psid MAWP
- Field convertible single or two-stage operation
- Acoustically and mechanically analyzed for a wide range of operational parameters

VRS-2 Compressor

- 275 HP Frame Rating
- 20,000 lbs Combined Rod Load.
- 1,800 RPM Maximum Speed

VRS-4 Compressor



- 550 HP Frame Rating
- 20,000 lbs Combined Rod Load
- 1,800 RPM Maximum Speed
