

ADJUSTABLE MOUNT VRC29309A

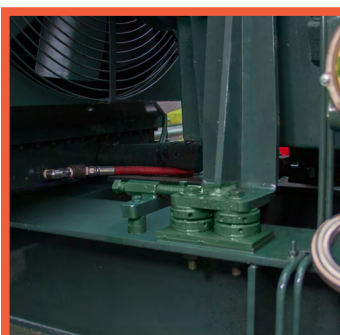

The Arrow VRC29309A Adjustable Mounts are permanent, strong, and reusable mounting chocks for all types of rotating or critically aligned machinery. It makes accurate mounting and alignment simple and quick on a base frame, concrete skid, or steel foundation without expensive machining of the base or extra work of installing epoxy resin chocks or shims.

Advantages

- Self-leveling, height-adjustable and reusable
- Creates perfect mounting plane within minutes
- Standard sizes and custom engineered design
- Saves time and money over cumbersome shims
- Preferred by mechanic and assembly technicians

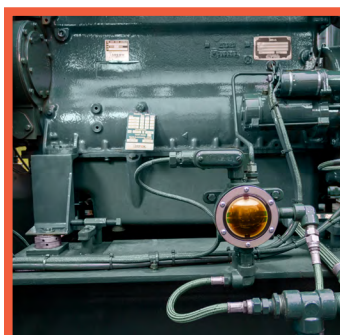

Spanner tool adjusts height for a perfect fit

Top washer base makes a quick self-leveling surface

Easily realign during the life of the component.

Custom sizes can be made to fit your requirements
